

Datalynx DMS CloudRamp for Fusion Apps

Easily transition your valuable legacy data to the Oracle Cloud.

DMS CloudRamp - preconfigured migration to Oracle Fusion Apps

Datalynx DMS CloudRamp provides the fastest, most comprehensive and lowest-risk route when migrating data to Oracle Fusion HCM and Financials.

Developed in close cooperation with Oracle, CloudRamp offers a verified repeatable process that incorporates all the intelligence to extract, validate, transform and migrate data to Fusion. CloudRamp provides a standard data migration path from Oracle eBusiness Suite, as well as from any non-Oracle legacy applications that you wish to transition to the Oracle Cloud.

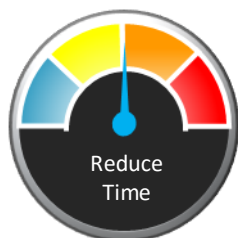

On-premise to Cloud and Cloud to Cloud data migration.

Harnessing the power of the versatile Datalynx DMS platform, CloudRamp provides access to extended migration capabilities such as data quality enhancement and standardisation, data transformation, master record creation, data archiving and more.

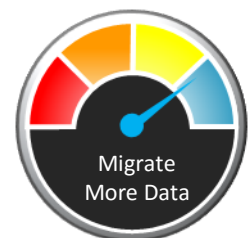

Reduce Costs

Reduce Time

Increase Quality

Migrate More Data

CloudRamp enables you to migrate as much, or as little data as you need and is licensed via a cost-effective Cloud-based "as a service" subscription model.
